

TRANSITION TOWN KINGSTON -

creating a resilient and sustainable community together

Transition Town Kingston is a community-based movement helping to raise awareness of climate change and encourage the transition to a low-carbon future. We aim to build a resilient local community by:

- ✦ **Educating and campaigning** about climate change
- ✦ **Exploring and facilitating** alternatives to fossil-fuel-based energy
- ✦ **Challenging** oil-dependent transport, and **promoting** and **lobbying** for sustainable alternatives such as cycling...
- ✦ **Encouraging** sustainable food production and wiser consumption
- ✦ **Supporting** practical projects and activities such as community gardening, harvesting and juicing unwanted fruit, skill-sharing, repairing, upcycling, and reusing...
- ✦ **Organising** events and workshops to foster waste reduction, permaculture, energy-efficiency, a more sustainable local economy, personal resilience...
- ✦ **Sharing** information and news via our website, the Kingston Green e-Directory and the monthly e-newsletter *Kingston Environment News*
- ✦ **Celebrating** cooperation, collaborations, friendships and successes

"... If we wait for the governments, it'll be too little, too late. If we act as individuals, it'll be too little. But if we act as communities, it might just be enough, just in time."

Rob Hopkins, Transition movement founder
in *What is a Transition Initiative?*
