# Kingston Wild Ways

**- connecting green spaces for wildlife and people.**

"No bees, no food. These tiny pollinators are essential to our planet - let's protect them before it's too late". **David Attenborough**

"Imagine trying to travel around the UK without our road and rail network. Or imagine if nine out of every ten miles of road just didn't exist - life would be impossible! That is the situation faced by our vital pollinators and other bugs." **Buglife**

If you have a garden, a balcony, a flat roof, a doorstep... could you make it wilder and greener to help connect our green spaces and improve the environment for wildlife and people?
